## Full-Stack Developer | MERN Stack Developer | Software Engineer

Rawalpindi, Pakistan | [awaissaeed054@gmail.com](mailto:awaissaeed054@gmail.com) | +92 303 0573119 | Portfolio: [awaissaeed-eng.github.io](https://awaissaeed-eng.github.io)

---

### SUMMARY

Full-Stack Developer specializing in MERN stack and Python (Flask), with experience in full stack web development, REST API development and API integration. Skilled in building scalable applications with authentication systems, CRUD operations, and database management using MongoDB and MySQL. Proven ability to deliver real-world projects including e-commerce platforms and enterprise systems. Focused on clean architecture, performance optimization and deployment.

---

### EXPERIENCE

#### Freelance Full-Stack Developer

SEYA Fashion E-Commerce | [seyafashion.com.pk](https://seyafashion.com.pk)

Dec 2025 – Jan 2026

- Engineered a full-scale MERN stack e-commerce platform used by real customers, enabling complete product browsing, cart management and secure checkout.
  - Designed and implemented an admin panel improving product, order and customer management efficiency.
  - Implemented RESTful APIs, JWT authentication and authorization ensuring secure user access and data protection.
  - Delivered a fully responsive UI, improving usability across mobile and desktop devices.
  - Deployed full-stack application on production hosting environment for real-world client usage.
- 

#### Freelance Full-Stack Developer

Spice Hut Restaurant System | [spicehut-8mqx.onrender.com](https://spicehut-8mqx.onrender.com)

Oct 2025 – Nov 2025

- Architected and deployed a multi-branch restaurant ordering system supporting real-time order placement across multiple locations.
  - Built responsive frontend and backend APIs handling authentication, branch selection, and order processing.
  - Collaborated in a two-person team, integrating frontend with an admin panel into a unified system.
  - Improved system usability by implementing location-based nearest branch detection.
- 

#### Full-Stack Developer Intern

National Electric Power Regulatory Authority (NEPRA)

Jul 2025 – Sep 2025 | Islamabad

- Developed an IT Asset Inventory Management System tracking 100+ assets across multiple departments.
  - Replaced manual processes, reducing administrative workload and improving efficiency by an estimated 40%.
  - Built a React frontend and Python (Flask) backend managing full asset lifecycle including assignment, repair tracking and status monitoring.
  - Designed a real-time dashboard for organization-wide asset monitoring and reporting.
  - Optimized database queries to improve system performance and response time.
- 

### PROJECTS

#### Gaming Through Voice Recognition System (FYP)

- Collaborated in a three-person team to build an accessibility-focused desktop application enabling users with upper limb disabilities to control and play games entirely through voice commands.
  - Owned the backend development, implementing the offline voice recognition engine for real-time command processing without internet dependency.
  - Developed backend logic for voice-based game control including navigation, game launching and in-game interaction features.
  - Coordinated with the frontend developer to integrate backend voice processing with a desktop UI, delivering a functional accessibility tool for disabled users.
- 

### EDUCATION

#### Bachelor of Software Engineering

National University of Modern Languages (NUML), Islamabad

Feb 2022 – Feb 2026

GPA: 3.27 / 4.0

---

### SKILLS

**Languages:** JavaScript (ES6+), Python, C#

**Frontend Development:** React.js, HTML5, CSS3, Tailwind CSS, Bootstrap

**Backend Development:** Node.js, Express.js, Flask, RESTful APIs, JWT Authentication

**Databases:** MongoDB, MySQL, Database Design, Query Optimization

**Tools & Platforms:** Git, GitHub, Postman, VS Code

---

### ACHIEVEMENTS

- Built and deployed 3 production-level full-stack applications, delivering solutions independently and in collaborative team environments.
- Completed internship at NEPRA, contributing to the development of a live government IT system.
