SUMMARY

MERN Stack Developer with a government internship at NEPRA and 3 live production applications delivered for real clients in Pakistan and Canada. Available to join immediately.

EXPERIENCE

Full-Stack Developer Intern | National Electric Power Regulatory Authority (NEPRA) — Islamabad *Jul 2025 – Sep 2025*

- Developed an IT Asset Inventory Management System tracking 100+ assets across multiple departments, replacing manual processes and improving efficiency by ~40%.
- Built React.js frontend and Python (Flask) backend managing full asset lifecycle - assignment, repair tracking and status monitoring.
- Designed a real-time dashboard for organization-wide asset monitoring used by management daily. Optimized MySQL queries for improved response time.

Freelance Full-Stack Developer | Spice Hut Restaurant System — spicehutcanada.com *Oct 2025 – Nov 2025*

- Built a multi-branch restaurant ordering system supporting real-time orders across 10+ locations, with location-based branch detection and full authentication flow.
- Collaborated in a two-person team integrating React frontend with Node.js/Express backend and admin panel.

Freelance Full-Stack Developer | SEYA Fashion — seyafashion.com.pk *Dec 2025 – Jan 2026*

- Engineered a full-scale MERN e-commerce platform for a Seya fashion brand - product browsing, cart, secure checkout and admin panel for order and customer management.
- Implemented RESTful APIs, JWT authentication and role-based authorization. Deployed to live production environment currently serving real customers.

PROJECTS

Bhai Bhai Group of Companies — Business Portfolio Website (In Progress)

- Building a multi-page business portfolio for a real client showcasing 56+ businesses across 10 categories — includes individual business detail pages, Google Maps embed, EmailJS contact forms and WhatsApp integration.
- HTML5, Tailwind CSS, Vanilla JavaScript with a clean data-driven architecture. Currently in active development with client review ongoing.

Gaming Through Voice Recognition — Final Year Project

- Built offline Python voice recognition engine (Vosk + pyautogui) enabling upper-limb disabled users to control games entirely through voice - no internet required. Integrated with C# WPF desktop UI.
- Presented at university as an accessibility solution for upper-limb disabled users, recognised for social impact in human-computer interaction.

EDUCATION

Bachelor of Software Engineering | National University of Modern Languages (NUML), Islamabad *Feb 2022 – Feb 2026*

GPA: 3.27 / 4.0 | 3-time HEC Zonal Table Tennis Champion - Singles & Doubles titles at university department level, NUML Islamabad

SKILLS & ACHIEVEMENTS

Languages & Frontend: JavaScript (ES6+), Python | React.js, HTML5, CSS3, Tailwind CSS

Backend & Databases: Node.js, Express.js, Flask, REST APIs, JWT Authentication | MongoDB, MySQL

Tools: Git, GitHub, Postman, VS Code, GitHub Pages

- 3 live production applications delivered for real clients — UK fashion brand (seyafashion.com.pk), Canadian restaurant (Spice Hut), and BB Group franchise portfolio.
- Only intern in NEPRA batch to independently design and deploy a live government IT system still in active use after internship completion.
