Portfolio: [awaissaeed-eng.github.io](#)

SUMMARY

Web developer with hands-on experience building and deploying production level web applications using the MERN stack and Python (Flask). Delivered real-world systems for a Canadian restaurant chain, a fashion e-commerce brand and a live government IT platform at NEPRA - all shipped to actual users. Comfortable owning projects end-to-end: from database design and REST API development to responsive frontend and cloud deployment. Open to MERN Stack, Web developer or Software Engineer roles where I can ship real products from day one.

EXPERIENCE

Freelance Web Developer

SEYA Fashion E-Commerce | [seyafashion.com.pk](#)

Dec 2025 – Jan 2026

- Engineered a full-scale MERN stack e-commerce platform used by real customers, enabling complete product browsing, cart management and secure checkout.
- Designed and implemented an admin panel improving product, order and customer management efficiency.
- Implemented RESTful APIs, JWT authentication and authorization ensuring secure user access and data protection.
- Built a fully responsive UI with React, Tailwind CSS and custom animations, improving usability across mobile and desktop devices.
- Delivered the project solo within a 2-month timeline, serving a live client with active customer traffic at seyafashion.com.pk.

Freelance Web Developer

Spice Hut Restaurant System | [spicehutcanada.com](#)

Oct 2025 – Nov 2025

- Architected and deployed a multi-branch restaurant ordering system supporting real-time order placement across multiple locations.
- Built responsive frontend and backend APIs handling authentication, branch selection, and order processing.
- Collaborated in a two-person team, integrating frontend with an admin panel into a unified system.
- Delivered a production-ready system for a Canadian client, handling real orders across multiple restaurant branches.

Web Developer Intern

National Electric Power Regulatory Authority (NEPRA)

Jul 2025 – Sep 2025

- Developed an IT Asset Inventory Management System adopted organization-wide at a federal regulatory authority, tracking 100+ assets across multiple departments.
- Eliminated manual spreadsheet-based tracking, reducing administrative workload by an estimated 40% and cutting asset-lookup time significantly.
- Built a React + Flask full-stack system with role-based access control, real-time dashboard and full asset lifecycle management (assignment, repair, return).
- Optimized MongoDB/MySQL queries, improving average page load and report generation speed for daily operational use.

PROJECTS

Gaming Through Voice Recognition System (FYP)

- Built an assistive technology desktop application enabling upper-limb disabled users to play PC games entirely through voice commands - addressing a real accessibility gap with zero internet dependency.
- Integrated offline voice recognition system for real-time command execution without internet dependency.
- Implemented voice-based navigation, game launching and in-game interaction features.
- Designed an intuitive WPF-based interface to enhance accessibility and ease of use for disabled users.
- Utilized speech recognition models (e.g., Vosk) for accurate voice command processing.

EDUCATION

Bachelor of Software Engineering

National University of Modern Languages (NUML), Islamabad

Feb 2022 – Jan 2026

GPA: 3.27 / 4.0

SKILLS

Languages: JavaScript (ES6+), Python, C#

Frontend Development: React.js, HTML5, CSS3, Tailwind CSS, Bootstrap

Backend Development: Node.js, Express.js, Flask, RESTful APIs, JWT Authentication

Databases: MongoDB, MySQL, Database Design, Query Optimization

Tools & Platforms: Git, GitHub, Postman, VS Code

Deployment: Render, Hostinger, Vercel

ACHIEVEMENTS

- Only intern at NEPRA (Jul–Sep 2025) to independently design, build and deploy a full-stack IT system adopted for live organizational use.
- Won (HEC-E) competition 3 times, including a department-level victory at NUML Islamabad.
